

# Cats

The cat (*Felis catus*) is a domestic species of small carnivorous mammal.

It is the only domesticated species in the family Felidae and is often referred to as the domestic cat to distinguish it from

A cat can either be a house cat, a farm cat, or a feral cat; the latter ranges freely and avoids human contact.

Domestic cats are valued by humans for companionship and their ability to kill rodents. About 60 cat breeds are recog

# Dogs

The dog or domestic dog (*Canis familiaris* or *Canis lupus familiaris*) is a domesticated descendant of the wolf.

# Foxes

Foxes are small to medium-sized, omnivorous mammals belonging to several genera of the family Canidae. They have

## Snakes

Snakes are elongated, limbless, carnivorous reptiles of the suborder Serpentes. Like all other squamates, snakes are ectothermic and their bodies are covered in scales. These resemble snakes, but several common groups of legless lizards have eyelids and external ears, which snakes lack.
